

BIRD BATH CARE INSTRUCTIONS

The birdbaths are made with stained glass on a terra cotta saucer. They are easy to clean with bleach, Tilex, soap and water. You may also scrub them with a scrub brush or scouring sponge. If you live in an area that experiences freezing weather, you must put the birdbath in a protected area (shed, covered porch, inside the house). The terra cotta can crack if it becomes wet and then freezes. The stand is made from powder coated wrought iron. The stained glass in the birdbath will never fade and it will beautify your garden for years to come.

MOSAIC TABLE CARE INSTRUCTIONS

If you are going to use your table outside, you **MUST** seal it. You may use any grout sealer (sold at any hardware store). Please seal it at least once a year. If you notice any grout separating along the top perimeter, re-grout with a sanded tile grout (color – charcoal from Home Depot). If used inside, you don't need to seal it.
